

Licensing model

for WF WireQueue-MQTT Toolkit

The license for the WF WireQueue-MQTT Toolkit is a so-called developer license. This means that one license must be bought by each developer using the toolkit.

Applications built using functions from the toolkit may be distributed in any number for free.

To use the LabVIEW toolkit a license cost applies.

One type of license exists:

- Single Seat Developer License

Frequently asked questions

Q. We are several developers in our department. Can we share one license?

A. No. The license is for one (1) active developer at a time.

Q. May I install the license on several computers?

A. Yes. For convenience, it is possible to have it installed on up to two (2) computers simultaneously.

Q. May I move the licence from one computer to another?

A. Yes.
